Doosan Infracore America is the fastest developing forklift and lift truck corporation in the North American market, due to its excellent level of product performance and their persistently high level of customer support and service given to all Doosan Infracore Forklift clients. The U.S. lift Truck division stationed in Cleveland has a expert team knowledgeable in Sales, Purchasing, Marketing, Logistical and Technical Support.

Korea's initial domestic forklift marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled forklifts as part of a national machinery expansion venture. Initial product sales of this industrial equipment focused on large business groups, the armed forces and on state-run firms. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical instruction became the new focus for improving quality and product development.

Domestic forklift business for Daewoo started in 1967 and grew to an amazing 90% market share in Korea. By the 1980's, Daewoo's progressive technological advancements combined with sales success placed them in a situation of significant growth of their forklift operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to assist them in the highly competitive North American materials handling industry. This joint-venture proved highly successful for Daewoo and their lift truck product sales expanded greatly. In 1984, the company completed construction of a new facility to help in manufacturing high end value-added goods for export. In 1993, the corporation had a international sales network and started exporting designs they had developed through in-house expertise, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into international markets.
